We are inviting Ms. Hikari Iwashita, who is currently pursuing her wildlife career arising from an educational background of wildlife related disciplines in Japan and the United States, to give us a talk in English. This seminar is open to all members of the public.

特定非営利活動法人 甲斐けもの社中 岩下ひかりさん

There are various ways to enjoy, study, and work on wildlife related field. Deep snow in Niigata, Japan, developed cold water and it forms great biodiversity in paddle fields. Montana, U.S. has been working on conserving Greater Yellowstone Ecosystem through releasing wolf population, and West Virginia, U.S. has deep deciduous forests with variety of amphibians. Each place has its own ecosystem, and those are just wonderful. I will talk about what I saw during my student life and how I decided my career. If you seek your future career in wildlife related field, or have some interests in wildlife, this lecture is for you all.
